ROUTEWISE SA

Help System and User Guide

Module XISD6329w | Group 2 | Task 2

RouteWise SA is a South African road companion for Android. You can see live road alerts on a map and report hazards you see.

1. Installing the app

You need an Android phone (Android 7.0 or newer) with an internet connection.

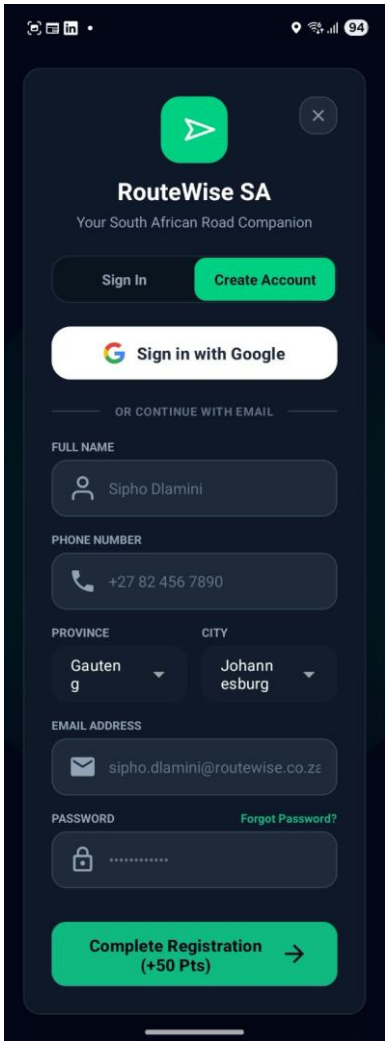

1. Copy the RouteWise APK file to your phone, or open the download link on the phone.
2. Tap the file. If Android says it cannot install apps from this source, tap Settings and allow installs from this source, then go back.
3. Tap Install, then Open.
4. When the app asks for permission to use your location, tap Allow. The map needs this.

If you already have an older copy of RouteWise on the phone, uninstall it first. Android will not install a new copy over one that was signed with a different key.

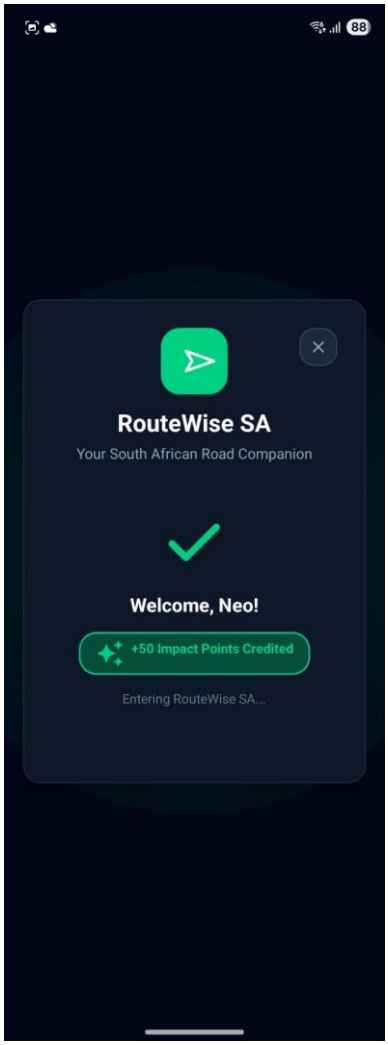

2. Creating an account

1. Open the app. The login screen has two tabs: Sign In and Create Account.
2. Tap Create Account.
3. Enter your full name, phone number (optional) and email address.
4. Choose your province and city from the lists.
5. Enter a password of at least 6 characters.
6. Tap the button at the bottom of the form to create your account.
7. You will see a welcome message and the app opens on the map.

Your password is never stored by the app. It is handled and encrypted by Firebase Authentication.

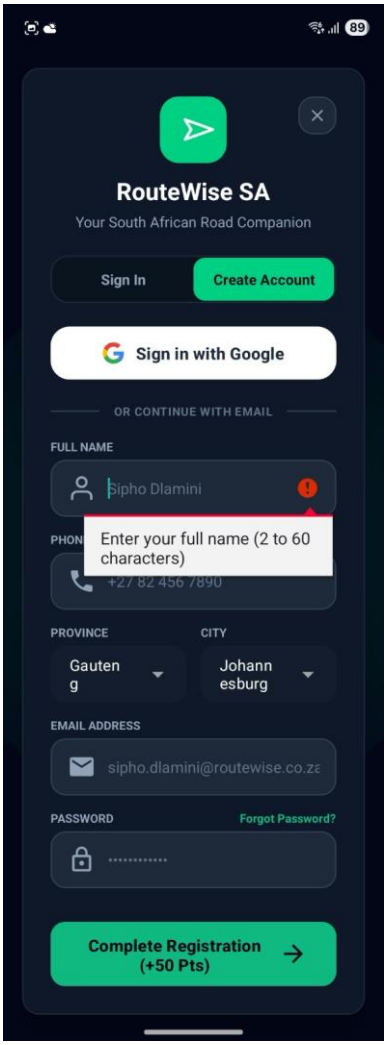

The Create Account tab

The welcome message after registering

If something goes wrong

What you see	What to do
Enter your full name	The name field is empty or too short. Type your name.
Enter a valid email	Type an email address in the form name@example.com.
Enter a valid phone number	Use digits only, for example +27 82 456 7890, or leave the phone field empty.
Password must be at least 6 characters	Choose a longer password.
An account with this email already exists	Use Sign In instead. If you first signed in with Google, use Sign in with Google.
No internet connection	Connect to Wi-Fi or mobile data and try again.

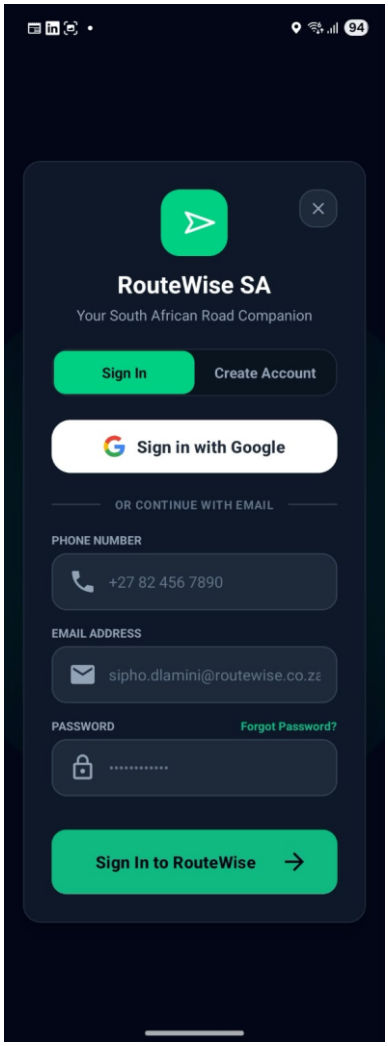

An error message on the Create Account form

3. Logging in

With your email

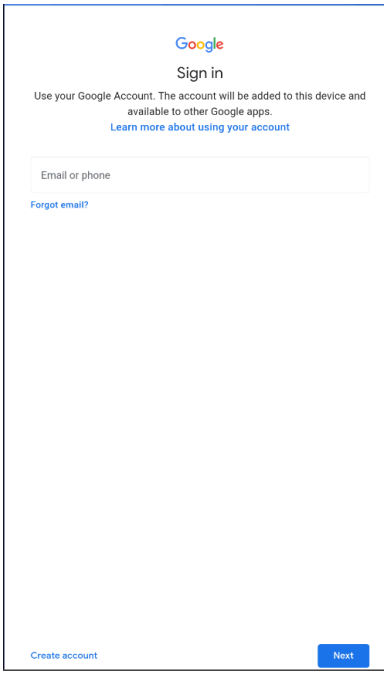

1. On the login screen, tap Sign In.
2. Enter your email address and password.
3. Tap the sign-in button.

The Sign In tab

With Google

1. On the login screen, tap Sign in with Google.
2. Choose your Google account from the list.
3. The app opens on the map.

The Google account screen

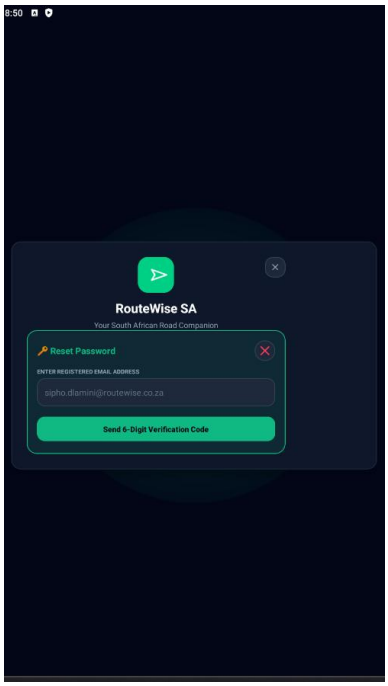

Logging out

1. Tap the menu icon to open the side menu.
2. Tap Logout at the bottom.

4. If you forget your password

1. On the Sign In tab, tap Forgot Password?
2. Enter the email address you registered with and tap Send.
3. Open the email from Firebase (it may be in your spam folder) and follow the link to choose a new password.
4. Go back to the app and log in with the new password.

If you signed up with Google there is no password to reset. Use Sign in with Google instead.

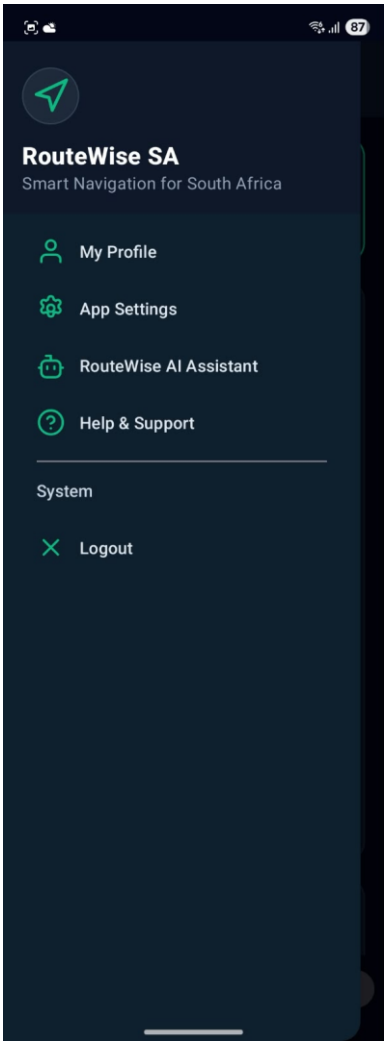

The Reset Password screen

5. Finding your way around

The bottom bar has the tabs below. (The Navigation tab is not covered in this guide.)

Tab	What it does
Map	Shows the map with road incidents near you.
Alerts	A list of live alerts reported by other drivers.
Report	Report a hazard you see on the road.

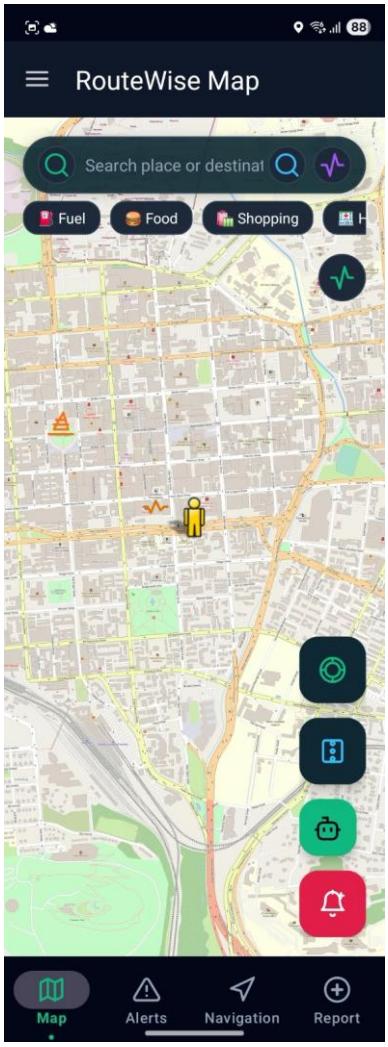

Tap the menu icon at the top left to open the side menu. It has My Profile, App Settings, RouteWise AI Assistant, Help & Support and Logout.

The side menu

6. Using the map

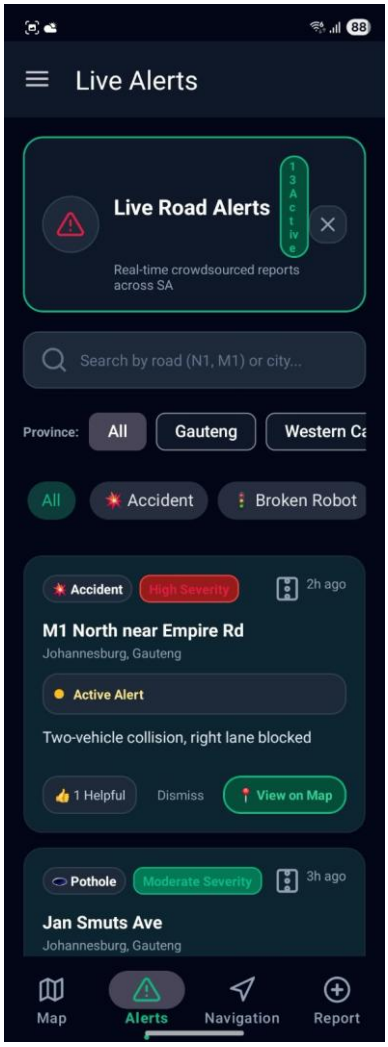

1. Tap Map in the bottom bar.
2. Allow location access when asked.
3. Pinch to zoom and drag to move around the map. Tap an incident marker to see its details.

The map with incident markers

7. Reading the alert feed

1. Tap Alerts in the bottom bar.
2. Scroll the list. Each alert shows the type of incident, the road, the city and the time.
3. Tap a province button or an incident type button at the top to filter the list.

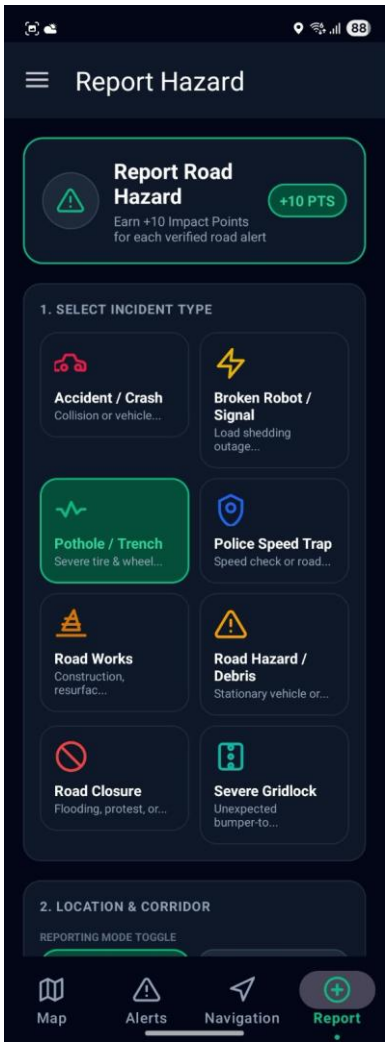

The alert feed

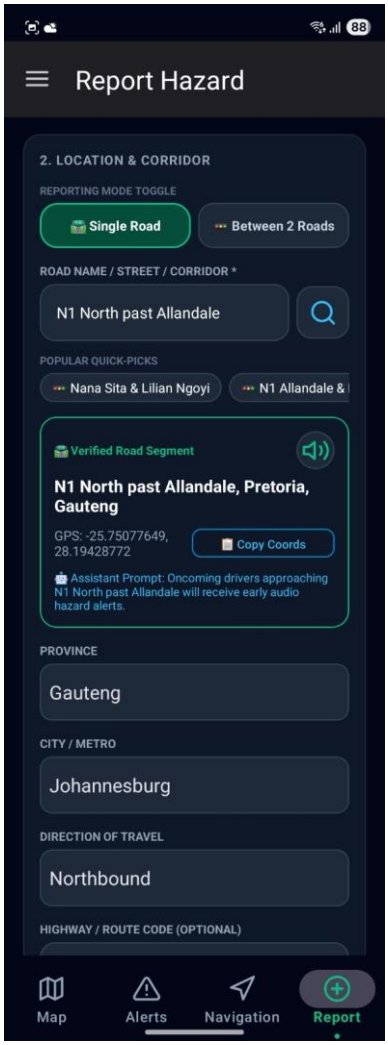

8. Reporting an incident

You can report a hazard in a few steps.

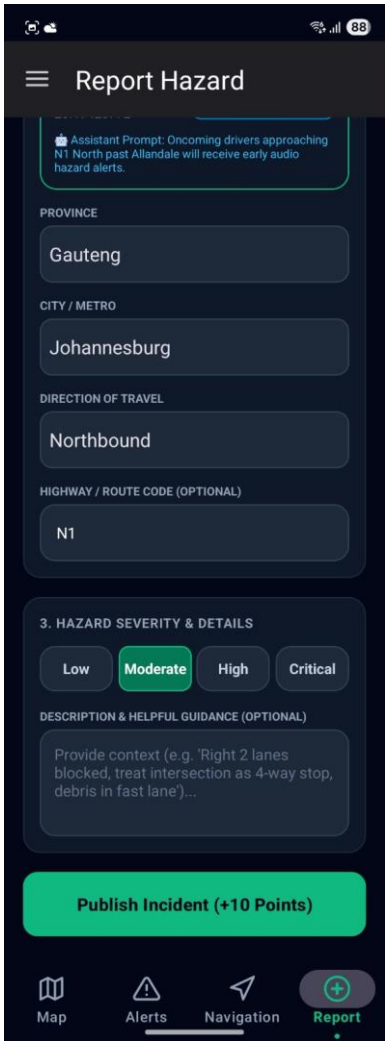

1. Tap Report in the bottom bar.
2. Step 1: choose the incident type. The choices are Accident / Crash, Broken Robot / Signal, Pothole / Trench, Police Speed Trap, Road Works, Road Hazard / Debris, Road Closure and Severe Gridlock.
3. Step 2: choose the location. Use Single Road and type the road name, or use Between 2 Roads and enter both roads.
4. Choose the province and city.
5. Add a short description if you want to (up to 500 characters).
6. Tap the publish button at the bottom. You will see a confirmation and the app moves to the map.

Report Hazard, step 1: choose the incident type

Report Hazard, step 2: choose the location

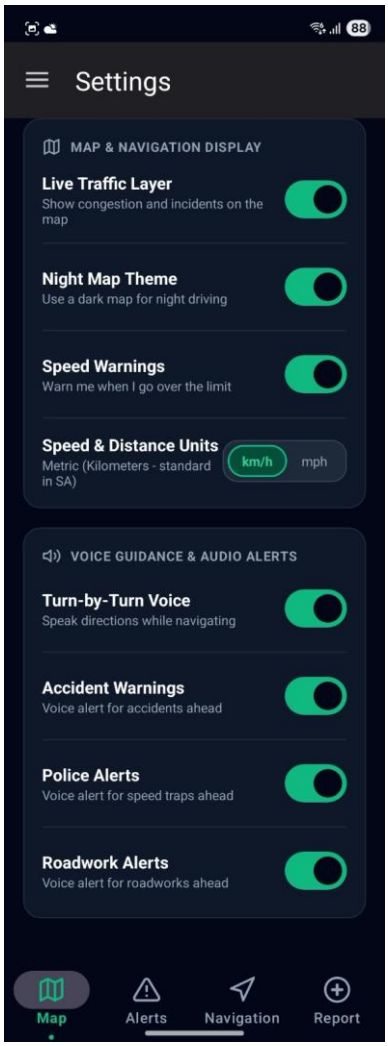

Report Hazard, step 3: severity, details and publish

If something goes wrong

What you see	What to do
Road Name / Intersection is required	Type or pick a road before you publish.
Please enter both Primary Road 1 & Intersecting Road 2	You chose Between 2 Roads. Fill in both roads.
Description must be 500 characters or fewer	Shorten the description.

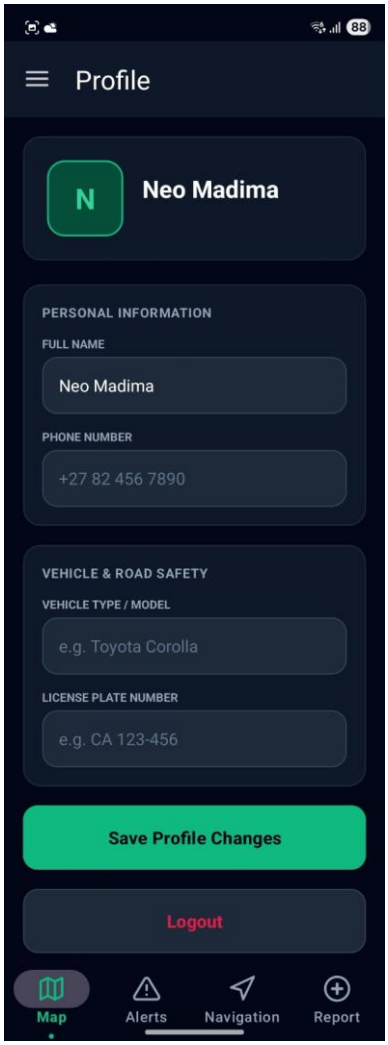

9. Changing your settings

1. Tap the menu icon, then App Settings.
2. Switch the options on or off, for example Night Map Theme, and choose Speed & Distance Units: km/h or mph.
3. A short message confirms each change. Your choices are saved on the phone and are still set when you close and reopen the app.

The Settings screen

To change your details, tap the menu icon, then My Profile. Edit your name and phone number, then tap Save Profile Changes. The message "Profile saved" confirms the change.

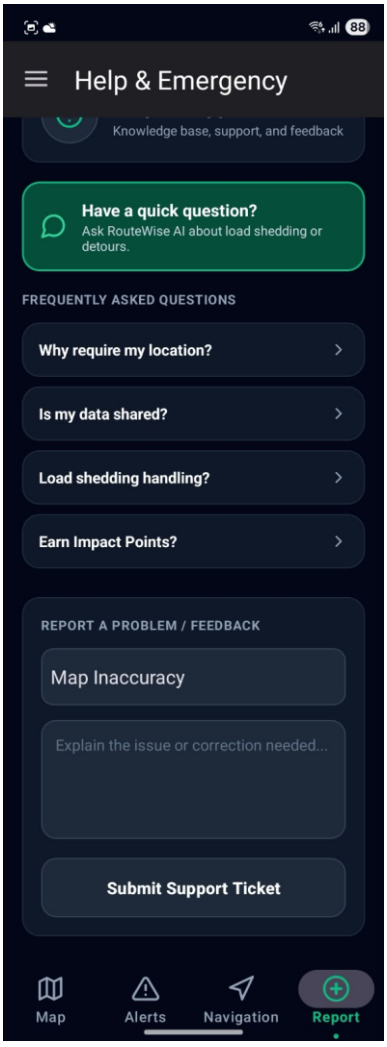

The My Profile screen

10. Getting help

Tap the menu icon, then Help & Support. You can send a support ticket there to report a problem or send feedback.

Sending a support ticket

1. Choose a category: Map Inaccuracy, Voice Guidance Issue, App Bug or Feature Request.
2. Describe the problem in the box (up to 500 characters).
3. Tap Submit Support Ticket. The message "Support ticket sent. Thank you!" confirms it was sent. You need an internet connection.

The Help & Support screen

11. Troubleshooting

Problem	What to try
The map is empty or I see no alerts	Check your internet connection. Check that location is switched on and that RouteWise has the Location permission in your phone settings.
I cannot log in	Check your email spelling and password. Use Forgot Password? if needed.
Google sign-in does nothing	Make sure a Google account is added on your phone and that you are online.
The app closed unexpectedly	Open it again. If it keeps happening, send a support ticket with what you were doing.
